

Stage I: 3 weeks (May 28- June 14)

Intensive training at Diné College-Tsaile Campus (Arizona), where students develop skills in disease prevention and health promotion research techniques. This course includes topics such as Public Health, Ethics and Research Methods, Epidemiology, Statistics, Health Promotion and Disease Prevention, Nutrition and Nutritional Assessment, and Cancer and Diabetes Disease Processes and Prevention Approaches.

Stage II: 6 weeks (June 17 - July 26)

The student interns are placed in or near their home communities at health care facilities or educational institutions where they will participate in a variety of ongoing public health and health research or related projects.

Stage III: 1 week (July 29- August 2)

At the conclusion of the program, the students and staff will work on analysis of data and presentation of their experiences in public health and health research.

North Country Health Care, Flagstaff, AZ

Diné College -

has developed a unique summer program for Native American students interested in public health research and has provided the program every summer since 2000. The vision of SREP at Diné College is to prepare Native American students for careers in public health and health research and to strengthen research capabilities of Tribal Colleges and Universities.

The program is available to undergraduate college students who have completed some course work in English, Math, Lab Science and Social Science areas, and provides a culturally supportive atmosphere for developing a strong, multicultural approach in public health and health research work. The 10-week program will help students to develop skills and interests in public health and health research and participate first hand in community based, ongoing projects at Diné College, the Navajo Nation or other Native American communities.

While participating in SREP, the students receive:

- \$3,920 stipend (distributed in installments through the program)
- Books and Materials
- 7 transferable college credit hours (4 classroom and 3 practicum)
- Coverage for all college fees and tuition.

During the 3-week training session at Diné College-Tsaile Campus, room and board are provided without charge for all program participants.

Applications can be downloaded at:
